

Aggeliki Doxa

Aggeliki Doxa is a collaborating researcher at the Institute of Applied and Computational Mathematics, Foundation for Research and Technology – Hellas (IACM – FORTH). She holds a BSc in Environmental Sciences (University of the Aegean, 2004), a MSc in Ecology, Biodiversity & Evolution (University Pierre et Marie Curie, 2005) and a PhD in Ecology (Muséum National d'Histoire Naturelle-Paris, 2009). Her main scientific interests lie in the understanding of climatic and land use heterogeneity impacts on population and community dynamics of terrestrial and marine species, with a particular focus on optimizing conservation planning at the local and large scale in the Mediterranean region. She has worked as a researcher at a number of international centers and organizations: Pierre et Marie Curie University, Ecology and Conservation Science Centre – National Museum of Natural History, Functional and Evolutionary Ecology Center, Institute of Evolution Sciences of Montpellier, Mediterranean Institute of marine and terrestrial Biodiversity and Ecology - University of Aix-Marseille, Instituto Mediterráneo de Estudios Avanzados and the Joint Research Centre.
